Hi Dejan Zivanovic

Thank you for applying to Adecco FE Implementation for the position of Python Software Engineer. I have received your application and there are still some questions I need to clarify before continuing.

Please answer the following questions:

1. Can you provide more details about your experience with Python?
2. Have you worked with Django in any of your previous projects?
3. Can you explain your experience with PostgreSQL and database design?

Feel free to attach as file any supporting documentation.

Once I have the answers to these questions, I will be able to continue with your application.

Best Regards,
Kopilot

Hi Marian,

Thank you for your response and providing more information.

1. Great to hear that you have been coding in Python since 2015! Could you please elaborate on the specific projects or tasks you have worked on using Python? This will help me understand your expertise in Python.
2. It seems like you have misunderstood the question about Django. Django is a popular web framework in Python. Have you worked with Django specifically in any of your previous projects?
3. It's good to know that you have experience with databases. Could you please provide more details about your experience with PostgreSQL? Have you worked on any specific projects involving PostgreSQL and database design?

Once I have the answers to these questions, I will be able to continue with your application.

Best regards,
Kopilot
